## 4 globus gsi callback Module Documentation

### 4.1 Activation

Globus GSI Callback uses standard Globus module activation and deactivation.

De nes

```
#define GLOBUS_GSI_CALLBACK_MODULE
```

#### 4.1.1 Detailed Description

Globus GSI Callback uses standard Globus module activation and deactivation.

Before any Globus GSI Callback functions are called, the following function must be called:

```
globus_module_activate(GLOBUS_GSI_CALLBACK_MODULE)
```

This function returns `GLOBUS_SUCCESS` if Globus GSI Callback was successfully initialized, and you are therefore allowed to subsequently call Globus GSI Callback functions. Otherwise, an error code is returned, and Globus GSI Credential functions should not be subsequently called. This function may be called multiple times.

To deactivate Globus GSI Callback, the following function must be called:

```
globus_module_deactivate(GLOBUS_GSI_CALLBACK_MODULE)
```

This function should be called once for each time Globus GSI Callback was activated.

#### 4.1.2 De ne Documentation

##### 4.1.2.1 #define GLOBUS\_GSI\_CALLBACK\_MODULE

Module descriptor.

### 4.2 Callback Functions

Functions that plug into various plug points in the OpenSSL path validation mechanism.

Get callback data index from X509\_STORE

```
globus_result_t globus_gsi_callback_get_X509_STORE_callback_data_index(int index)
```

Get callback data index from SSL structure

```
globus_result_t globus_gsi_callback_get_SSL_callback_data_index(int index)
```

Certificate verify wrapper

```
int globus_gsi_callback_X509_verify_cert(X509_STORE_CTX context, void arg)
```

Independent path validation callback.

```
int globus_gsi_callback_createproxy_callback(int preverify_ok, X509_STORECTX x509_context)
```

SSL path validation callback.

```
int globus_gsi_callback_handshake_callback(int preverify_ok, X509_STORECTX x509_context)
```

OpenSSL X509checkissued() wrapper

```
int globus_gsi_callback_checkissued(X509_STORECTX context, X509 cert, X509 issuer)
```

Typedefs

```
typedef int( globus_gsi_extension_callback_t )(globus_gsi_callback_data_t callback_data, X509_EXTENSION extension)
```

#### 4.2.1 Detailed Description

Functions that plug into various plug points in the OpenSSL path validation mechanism.

These functions add CRL checking, X509 Extension handling and proxy validation.

#### 4.2.2 Typedef Documentation

4.2.2.1 typedef int( globus\_gsi\_extension\_callback\_t)( globus\_gsi\_callback\_data\_t callback\_data, X509\_EXTENSION extension)

Typedef for a callback that may be registered for dealing with unhandled X.509 extension.

#### 4.2.3 Function Documentation

4.2.3.1 globus\_result\_t globus\_gsi\_callback\_get\_X509\_STORE\_callback\_data\_index (int index)

Retrieve or create the index for our callback data structure in the X509\_STORE.

Parameters:

index Will contain the index upon return

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.2.3.2 globus\_result\_t globus\_gsi\_callback\_get\_SSL\_callback\_data\_index (int index)

Retrieve or create the index for our callback data structure in the SSL structure.

Parameters:

index Will contain the index upon return

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

#### 4.2.3.3 `int globusgsi_callback_X509_verify_cert(X509_STORE_CTX context, void arg)`

This function wraps the OpenSSL certificate verification callback for the purpose of replacing the standard issuer check with one that deals with proxy certificates. Should be used with `SSL_set_cert_verify_callback()`

Parameters:

`context` The X509\_STORE\_CTX for which to register the callback.

`arg` Arguments to the callback. Currently ignored.

Returns:

1 on success 0 on failure

#### 4.2.3.4 `int globusgsi_callback_create_proxy_callback(int preverify_ok, X509_STORE_CTX x509_context)`

This function provides a path validation callback for validation outside of a SSL session. It should be used in `X509_STORE_set_verify_cb_func()`.

Parameters:

`preverify_ok` Communicates the result of default validation steps performed by OpenSSL

`x509_context` The validation state object

Returns:

1 on success 0 on failure

#### 4.2.3.5 `int globusgsi_callback_handshake_callback(int preverify_ok, X509_STORE_CTX x509_context)`

This function provides a path validation callback for the validation part of establishing a SSL session. It handles proxy certificates, X509 Extensions and CRL checking. It should be used in `SSL_set_verify()`.

Parameters:

`preverify_ok` Communicates the result of default validation steps performed by OpenSSL

`x509_context` The validation state object.

Returns:

1 on success 0 on failure

#### 4.2.3.6 `int globusgsi_callback_check_issued(X509_STORE_CTX context, X509 cert, X509 issuer)`

This function wraps the OpenSSL `X509_check_issued()` call and catches the error caused by the fact that a proxy certificate issuer may not have to have the correct KeyUsage fields set.

Parameters:

`context` The validation state object.

`cert` The certificate to check

`issuer` The issuer certificate to check

Returns:

1 on success 0 on failure

## 4.3 Callback Data Functions

Functions that deal with the data structure that contains state associated with the path validation callback.

Initializing and destroying a callback data structure

```
globusresult_t globusgsi_callbackdatainit (globusgsi_callbackdata_t callbackdata)
globusresult_t globusgsi_callbackdatadestroy(globusgsi_callbackdata_t callbackdata)
```

Copying a callback data structure

```
globusresult_t globusgsi_callbackdatacopy (globusgsi_callbackdata_t source, globusgsi_callbackdata_t dest)
```

Getting and setting the certificate chain depth

```
globusresult_t globusgsi_callbackgetcertdepth(globusgsi_callbackdata_t callbackdata, int certdepth)
globusresult_t globusgsi_callbacksetcertdepth(globusgsi_callbackdata_t callbackdata, int certdepth)
```

Getting and setting the "proxy chain" depth

```
globusresult_t globusgsi_callbackgetproxy_depth (globusgsi_callbackdata_t callbackdata, int proxy_depth)
globusresult_t globusgsi_callbacksetproxy_depth(globusgsi_callbackdata_t callbackdata, int proxydepth)
```

Getting and setting the certificate type

```
globusresult_t globusgsi_callbackgetcerttype (globusgsi_callbackdata_t callbackdata, globusgsi_cert_utils_cert_type_t certtype)
globusresult_t globusgsi_callbacksetcerttype (globusgsi_callbackdata_t callbackdata, globusgsi_cert_utils_cert_type_t certtype)
```

Getting and setting the certificate chain

```
globusresult_t globusgsi_callbackgetcertchain (globusgsi_callbackdata_t callbackdata, STACK_OF(X509) certchain)
globusresult_t globusgsi_callbacksetcertchain (globusgsi_callbackdata_t callbackdata, STACK_OF(X509) certchain)
```

Getting and setting the limited proxy handling setting

```
globusresult_t globusgsi_callbackgetmultiple_limited_proxy_ok (globusgsi_callbackdata_t callbackdata, int multiple_limited_proxy_ok)
globusresult_t globusgsi_callbacksetmultiple_limited_proxy_ok (globusgsi_callbackdata_t callbackdata, int multiple_limited_proxy_ok)
```

Getting and setting a set of X.509 extension OIDs.

```
globus_result_t globus_gsi_callback_get_extensionoids (globus_gsi_callback_data_t callbackdata, void
extensionoids)
globus_result_t globus_gsi_callback_set_extensionoids (globus_gsi_callback_data_t callbackdata, void
extensionoids)
```

Getting and setting the trusted certificate directory

```
globus_result_t globus_gsi_callback_get_cert_dir (globus_gsi_callback_data_t callbackdata, char cert_dir)
globus_result_t globus_gsi_callback_set_cert_dir (globus_gsi_callback_data_t callbackdata, char cert_dir)
```

Getting and setting the callback to be called for unknown X.509 extensions

```
globus_result_t globus_gsi_callback_get_extensioncb (globus_gsi_callback_data_t callbackdata, globus_gsi-
extension_callback_t extensioncb)
globus_result_t globus_gsi_callback_set_extensioncb (globus_gsi_callback_data_t callbackdata, globus_gsi-
extension_callback_t extensioncb)
```

Getting and setting the error status

```
globus_result_t globus_gsi_callback_get_error (globus_gsi_callback_data_t callbackdata, globus_result_t error)
globus_result_t globus_gsi_callback_set_error (globus_gsi_callback_data_t callbackdata, globus_result_t error)
```

Getting and setting the check self-signed policy flag

```
globus_result_t globus_gsi_callback_get_check_policy_for_self_signed_certs (globus_gsi_callback_data_t call-
backdata, globus_bool_t check)
globus_result_t globus_gsi_callback_set_check_policy_for_self_signed_certs (globus_gsi_callback_data_t call-
backdata, globus_bool_t check)
```

Typedefs

```
typedef globus_gsi_callback_data_t globus_gsi_callback_data_t
```

#### 4.3.1 Detailed Description

Functions that deal with the data structure that contains state associated with the path validation callback.

#### 4.3.2 Typedef Documentation

##### 4.3.2.1 typedef struct globus\_gsi\_callback\_data\_s globus\_gsi\_callback\_data\_t

Callback data typedef.

#### 4.3.3 Function Documentation

##### 4.3.3.1 `globusresult_t globus_gsi_callback_data_init (globus_gsi_callback_data_t callback_data)`

This function initializes a `globus_gsi_callback_data_t`.

Parameters:

`callback_data` Reference to the structure to be initialized

Returns:

`GLOBUS_SUCCESS` unless an error occurred, in which case, a globus error object ID is returned

##### 4.3.3.2 `globusresult_t globus_gsi_callback_data_destroy (globus_gsi_callback_data_t callback_data)`

This function destroys a `globus_gsi_callback_data_t`.

Parameters:

`callback_data` The structure to be destroyed

Returns:

`GLOBUS_SUCCESS` unless an error occurred, in which case, a globus error object ID is returned

##### 4.3.3.3 `globusresult_t globus_gsi_callback_data_copy (globus_gsi_callback_data_t source, globus_gsi_callback_data_t dest)`

This function copies a `globus_gsi_callback_data_t`.

Parameters:

`source` The structure to be copied

`dest` The destination of the copy

Returns:

`GLOBUS_SUCCESS` unless an error occurred, in which case, a globus error object ID is returned

##### 4.3.3.4 `globusresult_t globus_gsi_callback_get_cert_depth (globus_gsi_callback_data_t callback_data, int cert_depth)`

This function returns the certificate chain depth.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to retrieve the depth from

`cert_depth` The returned certificate chain depth

Returns:

`GLOBUS_SUCCESS` unless an error occurred, in which case, a globus error object ID is returned

4.3.3.5 `globusresult_t globus_gsi_callback_set_cert_depth (globus_gsi_callback_data_t callback_data, int cert_depth)`

This function sets the certificate chain depth.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to retrieve the depth from

`cert_depth` The certificate chain depth

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.6 `globusresult_t globus_gsi_callback_get_proxy_depth (globus_gsi_callback_data_t callback_data, int proxy_depth)`

This function returns the number of proxies in the certificate chain.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to retrieve the depth from

`proxy_depth` The returned "proxy chain" depth

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.7 `globusresult_t globus_gsi_callback_set_proxy_depth (globus_gsi_callback_data_t callback_data, int proxy_depth)`

This function sets the number of proxies in the certificate chain.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to retrieve the depth from

`proxy_depth` The "proxy chain" depth

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.8 `globusresult_t globus_gsi_callback_get_cert_type (globus_gsi_callback_data_t callback_data, globus_gsi_cert_utils_cert_type_t cert_type)`

This function returns the certificate type of the certificate currently being processed.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to retrieve the certificate type from

`cert_type` Variable containing the certificate type on return

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.9 `globusresult_t globus_gsi_callback_set_cert_type (globus_gsi_callback_data_t callback_data, globus_gsi_cert_utils_cert_type_t cert_type)`

This function sets the certificate type of the certificate currently being processed.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the certificate type on  
`cert_type` The certificate type

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.10 `globusresult_t globus_gsi_callback_get_cert_chain (globus_gsi_callback_data_t callback_data, STACK_OF(X509) cert_chain)`

This function returns the certificate chain associated with the callback data.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to retrieve the certificate chain from.  
`cert_chain` Contains the certificate chain upon successful return

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.11 `globusresult_t globus_gsi_callback_set_cert_chain (globus_gsi_callback_data_t callback_data, STACK_OF(X509) cert_chain)`

This function sets the certificate chain associated with the callback data.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the certificate chain on  
`cert_chain` The certificate chain

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.12 `globusresult_t globus_gsi_callback_get_multiple_limited_proxy_ok (globus_gsi_callback_data_t callback_data, int multiple_limited_proxy_ok)`

This function gets the value of the limited proxy handling setting. This setting determines whether path validation will accept limited proxies that have been further delegated, ie certificate chains with a limited proxy followed by further proxies.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the limited proxy setting from  
`multiple_limited_proxy_ok` Contains the value of the setting upon successful return.

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

**Deprecated:**

This function always returns true now. It will be removed in the next release.

4.3.3.13 `globus_result_t globus_gsi_callback_set_multiple_limited_proxy_ok (globus_gsi_callback_data_t callback_data, int multiple_limited_proxy_ok)`

This function sets the value of the limited proxy handling setting. This setting determines whether path validation will accept limited proxies that have been further delegated, ie certificate chains with a limited proxy followed by further proxies.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the limited proxy setting on  
`multiple_limited_proxy_ok` The value of the setting

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

Deprecated:

This function has been turned into a no-op. It will be removed in the next release.

4.3.3.14 `globus_result_t globus_gsi_callback_get_extensionoids (globus_gsi_callback_data_t callback_data, void extensionoids)`

This function gets a list of X.509 extension OIDs that may be used by the extensions callback to allow or disallow certain extensions.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the array of extension OIDs from.  
`extensionoids` Contains the list of extension OIDs upon successful return.

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.15 `globus_result_t globus_gsi_callback_set_extensionoids (globus_gsi_callback_data_t callback_data, void extensionoids)`

This function sets a list of X.509 extension OIDs that may be used by the extensions callback to allow or disallow certain extensions.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the array of extension OIDs from.  
`extensionoids` The list of extension OIDs

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.16 `globus_result_t globus_gsi_callback_get_cert_dir (globus_gsi_callback_data_t callback_data, char cert_dir)`

This function gets the trusted certificate directory from the callback data.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the trusted certificates directory from.  
`cert_dir` Contains the path to the trusted certificate directory upon successful return.

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.17 `globus_result_t globus_gsi_callback_set_cert_dir (globus_gsi_callback_data_t callback_data, char cert_dir)`

This function sets the trusted certificate directory on the callback data.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the trusted certificates directory on.

`cert_dir` The path to the trusted certificate directory

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.18 `globus_result_t globus_gsi_callback_get_extensioncb (globus_gsi_callback_data_t callback_data, globus_gsi_extension_callback_t extensioncb)`

This function gets the callback that is called for unknown X.509 extensions.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the callback information from

`extensioncb` Contains the extension callback upon successful return.

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.19 `globus_result_t globus_gsi_callback_set_extensioncb (globus_gsi_callback_data_t callback_data, globus_gsi_extension_callback_t extensioncb)`

This function sets the callback that is called for unknown X.509 extensions.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the callback information on

`extensioncb` The extension callback

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.20 `globus_result_t globus_gsi_callback_get_error (globus_gsi_callback_data_t callback_data, globus_result_t error)`

This function gets the error status stored in the callback data.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the error from

`error` Contains the error upon successful return.

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.21 `globus_result_t globus_gsi_callback_set_error (globus_gsi_callback_data_t callback_data, globus_result_t error)`

This function sets the error status stored in the callback data.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the error on  
`error` The error

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

4.3.3.22 `globus_result_t globus_gsi_callback_get_check_policy_for_self_signed_certs (globus_gsi_callback_data_t callback_data, globus_bool_t check)`

This function gets the value of the "check policy for self-signed certificates" in the callback data. If this is set then the CA signing policy for a self-signed certificate must include a policy line that allows it to sign itself.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to get the error from  
`check` Contains the value of the `ag` upon successful return.

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

Since:

Globus Toolkit 4.2.1

4.3.3.23 `globus_result_t globus_gsi_callback_set_check_policy_for_self_signed_certs (globus_gsi_callback_data_t callback_data, globus_bool_t check)`

This function sets the value of the "check policy for self-signed certificates" in the callback data. If this is set then the CA signing policy for a self-signed certificate must include a policy line that allows it to sign itself.

Parameters:

`callback_data` The `globus_gsi_callback_data_t` to set the error on  
`check` New value of the `ag`

Returns:

GLOBUS\_SUCCESS unless an error occurred, in which case, a globus error object ID is returned

Since:

Globus Toolkit 4.2.1

## 4.4 GSI Callback Constants

Enumerations

```
enum globus_gsi_callbackerror_t { GLOBUS_GSI_CALLBACK_ERROR_SUCCESS = 0, GLOBUS_GSI_CALLBACK_ERROR_VERIFY_CRED = 1, GLOBUS_GSI_CALLBACK_ERROR_CERT_NOT_YET_
```

VALID = 2, GLOBUS\_GSI\_CALLBACK\_ERRORCANT\_GET\_LOCAL\_CA\_CERT = 3, GLOBUS\_GSI\_CALLBACK\_ERRORCERT\_HAS\_EXPIRED = 4, GLOBUS\_GSI\_CALLBACK\_ERRORINVALID\_PROXY = 5, GLOBUS\_GSI\_CALLBACK\_ERRORLIMITED\_PROXY = 6, GLOBUS\_GSI\_CALLBACK\_ERRORINVALID\_CRL = 7, GLOBUS\_GSI\_CALLBACK\_ERRORREVOKED\_CERT = 8, GLOBUS\_GSI\_CALLBACK\_ERRORMIXING\_DIFFERENT\_PROXY\_TYPES = 9, GLOBUS\_GSI\_CALLBACK\_ERRORWITH\_SIGNING\_POLICY = 10, GLOBUS\_GSI\_CALLBACK\_ERROROLD\_GAA = 11, GLOBUS\_GSI\_CALLBACK\_ERRORCALLBACK\_DATA = 12, GLOBUS\_GSI\_CALLBACK\_ERRORERRNO = 13, GLOBUS\_GSI\_CALLBACK\_ERRORCERT\_CHAIN = 14, GLOBUS\_GSI\_CALLBACK\_ERRORWITH\_CALLBACK\_DATA\_INDEX = 15, GLOBUS\_GSI\_CALLBACK\_ERRORPROXY\_PATH\_LENGTH\_EXCEEDED = 16, GLOBUS\_GSI\_CALLBACK\_ERRORLAST = 18g

#### 4.4.1 Enumeration Type Documentation

##### 4.4.1.1 enum globusgsi.callback.error\_t

GSI Callback Error codes.

Enumeration values:

GLOBUS\_GSI\_CALLBACK\_ERROR\_SUCCESS Success - never used.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_VERIFY\_CRED Error verifying credential.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_CERT\_NOT\_YET\_VALID The certi cate is not yet valid.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_CANT\_GET\_LOCAL\_CA\_CERT Unable to discover a local trusted CA for a given cert cate.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_CERT\_HAS\_EXPIRED The certi cate has expired.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_INVALID\_PROXY The proxy format is invalid.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_LIMITED\_PROXY Limited proxies are not accepted.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_INVALID\_CRL Invalid CRL.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_REVOKED\_CERT The certi cate has been revoked.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_MIXING\_DIFFERENT\_PROXY\_TYPES The cert chain contains both legacy on rfc compliant proxies.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_WITH\_SIGNING\_POLICY Could not verify certi cate chain against the signing policy for the issuing CA.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_OLD\_GAA OldGAA error.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_CALLBACK\_DATA Error with the callback data structure.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_ERRNO System error.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_CERT\_CHAIN Error setting or getting the cert chain from callback data.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_WITH\_CALLBACK\_DATA\_INDEX Error getting callback data index.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_PROXY\_PATH\_LENGTH\_EXCEEDED Exceeded the path length speci ed in the proxy cert info extension.  
 GLOBUS\_GSI\_CALLBACK\_ERROR\_LAST Last marker - never used.
