

Frontend

Session directory

Cluster node

Session directory

```
graph LR; subgraph Frontend; SD1[Session directory]; end; subgraph Cluster_node [Cluster node]; SD2[Session directory]; end; SD1 --> SD2;
```

The diagram illustrates a data flow from a Frontend component to a Cluster node. On the left, a solid rectangular box labeled 'Session directory' is part of the 'Frontend'. Two horizontal arrows originate from its right side and point towards the 'Cluster node' on the right. The 'Cluster node' is a larger container that contains a dashed rectangular box, also labeled 'Session directory' in teal text. The top arrow points to the top edge of this dashed box, and the bottom arrow points to its bottom edge, indicating a transfer of the session directory data.
